EXPERIMENT NO. 7: ONLINE BEAUTY PARLOUR APPOINTMENT BOOKING SYSTEM

AIM:

To construct an online beauty parlour appointment booking platform that enables users to browse services, select beauty stylists, check real-time time slots, book appointments with online deposit payments, and manage salon schedules.

PSEUDOCODE (IN 6 SIMPLE POINTS):

Step 1: Initialize catalogue of parlour services (Hair Styling, Facial Glow, Spa & Massage, Bridal Makeup) with tariff and duration.

Step 2: Display stylist profiles with specialization ratings, customer reviews, and working shifts.

Step 3: Provide an interactive calendar date and slot selector that locks out occupied and unavailable hours.

Step 4: Authenticate the user and capture service selections, preferred stylist, and special aesthetic requirements.

Step 5: Compute bill with options for full payment or a partial 20% advance deposit via simulated payment gateway.

Step 6: Provide salon administrator dashboard to view scheduled reservations, update stylist availability, and issue client SMS reminders.

    </script>
</body>
</html>
```

Output:

RESULT:

Thus, the online beauty parlour appointment booking system was successfully developed and tested, allowing dynamic service selection, real-time slot lockout, advance deposit payments, and booking verification.
