EXPERIMENT NO. 10: STYLEHUB ONLINE FASHION RETAILER PLATFORM

AIM:

To construct an interactive fashion e-commerce portal for StyleHub featuring apparel/footwear categorization, interactive size and color selection, size guide assistance, slide-out shopping cart, and administrator product management.

PSEUDOCODE (IN 6 SIMPLE POINTS):

Step 1: Initialize fashion inventory categorized into Men, Women, and Children with subcategories for Casual, Formal, and Seasonal wear.

Step 2: Display stylish product showcase with high-resolution photo thumbnails, pricing, and dynamic filter controls.

Step 3: Provide product detail controls allowing customers to select apparel sizes (S, M, L, XL) and color swatches.

Step 4: Manage customer cart state, validating that proper sizes are selected prior to cart inclusion.

Step 5: Compute bill breakdown including item subtotal, applicable GST, and estimated shipping charges.

Step 6: Provide administrator features to introduce new season arrivals, update clothing pricing, and monitor order deliveries.

    }
  </script>
</body>
</html>
```

Output:

RESULT:

Thus, the StyleHub online fashion retailer platform was successfully designed and tested, implementing apparel catalog categorization, dynamic size selection, shopping bag management, and order checkout.
