EXPERIMENT NO. 14: RENEWMARKET SECOND-HAND GOODS ONLINE MARKETPLACE

AIM:

To construct the ReNewMarket C2C marketplace enabling sellers to list pre-loved goods (Electronics, Furniture, Clothing), buyers to search items and negotiate counter-offers, and administrators to track logistics statuses (Shipped/Received).

PSEUDOCODE (IN 6 SIMPLE POINTS):

Step 1: Provide user registration and login modules supporting dual roles for buyers and sellers.

Step 2: Enable sellers to upload second-hand commodities specifying item title, description, category, condition, and asking price.

Step 3: Display an interactive marketplace listing searchable by product category, keyword, and budget.

Step 4: Implement a price negotiation counter-offer feature enabling buyers to submit bids directly to sellers.

Step 5: Update transaction records upon deal agreement and generate shipment tracking numbers.

Step 6: Equip admin with controls to delete fraudulent listings, moderate user accounts, and update logistics delivery status.

</body>
</html>
```

Output:

RESULT:

Thus, the ReNewMarket second-hand goods marketplace was successfully built and tested, featuring seller listing uploads, buyer item searches, counter-offer price bidding, and logistics status updates.
